Game Instructions - In Person

- Form teams and pick a captain who will hit the buzzer.
- First team picks a category and point value.
- If team agrees on an answer, hit the buzzer - first team to buzz answers.
- Give the answer in the form of a question like “What is a rabbit?”
- For correct answers, that team is awarded the point value of the question and picks the next category and point value.
- For incorrect answers, the point value is deducted from the team's score and gives other team(s) the opportunity to buzz in and respond.
- If no correct response is given, correct response will be read, and the team who selected the previous clue chooses the next clue.
- We will keep score and play for a while or until the board is empty.
- Final Question - Write down what your team wants to wager and the team’s answer.

Game Instructions - Virtual

- We will play as individuals. Keep your own score if you like.
- I will choose the first category and point value.
- As soon as I read the item, if you know the answer, raise your hand.
- I will call on people based on the order of hands raised.
- Give the answer in the form of a question like “What is a rabbit?”
- For correct answers, add the point value to your score and select the next category and point value.
- For incorrect answers, deduct the point value from your score; I will call upon the next raised hand and go down the line.
- If no correct response is given, the correct response will be read, and I will select the next category and point value.
- We will play for a while or until the board is empty.
- Final Question - write down what you want to wager and your answer.
- Feel free to share your score at the end of the game.
