Drive-Through Flu Vaccine Clinic Instructions

You can help make this a safe experience for everyone.

1. **If you have a completed consent form for each person being vaccinated**, you will receive a “Flu” ticket. **Skip to instruction #5 on this page.**

2. **If you have NOT filled out a consent form, you will receive the following:**
   - Consent forms for each person who will be vaccinated.
   - Vaccine Information Statements (VIS) for the flu vaccine.
   - A “Flu” ticket for each person receiving vaccine.

3. Read the Vaccine Information Statement.
4. Fill out and sign one consent form for each person who will be vaccinated. (A parent or guardian must sign for each child under 18 years of age.)
5. Proceed to the second check point where staff will answer questions, review consents and direct you into the correct vaccination lane.
6. Please remove any coats, jackets or clothing with long sleeves. Children should have short sleeves or pant legs should be rolled up. Nurses must be able to access the upper thigh or upper arm of small children.

   **Merge slowly** into the traffic lane.

7. Screening staff will check your completed paperwork and see that everyone in the car is ready to be vaccinated.
8. When you are directed into the vaccination area, you will be asked to **put your car in park and shut off the engine.**
9. Consent forms will be collected and reviewed by nurses before administering your vaccine.
10. If we are not able to access your child in a car seat, we may ask you to get out of the car and remove your child from the car seat for the injection.

**After everyone in your vehicle has received their vaccine, children must be secured into their car seats prior to starting the car.**

You may proceed to the EXIT – follow the direction given by the traffic controllers. You may pull over onto the parking area located before the EXIT to rest for a few minutes. Please ensure that everyone, especially the driver, is feeling alright before you leave the stadium grounds.

Thank you for participating in the Anne Arundel County Drive-Through Flu Clinic. We hope you and your family have a safe and healthy year!
